

Year 12 Transition task for Disease Dilemmas

You will start Year 12 by studying Diseases Dilemmas unit, the world is impacted by many diseases which are either always present or we can have outbreaks of a disease such as Ebola in the DRC in May 2026. For your task you need to read the article from the Geographical Magazine plus do some of your own research and answer the following questions.

1. Using evidence can you explain why we need to tackle the problem of malaria?
2. What strategies have been used to tackle dealing with malaria?
3. Explain the range of reasons both physical and human to explain why it is difficult to eradicate malaria?

Extension

There are other diseases we will look at such as CVD, Polio and Guinea Worm – do some further research into these diseases to look at their causes, impacts and management,
